SCHOOL OF ENGINEERING
OF
TOKAI UNIVERSITY

VOL.56, No.2 2016

CONTENTS

Technical Papers

Construction of the Budding Yeast System which Exclusively Expresses Mannosyltransferase I Derived from Human Tetsuo TAKAHASHI, Yumiko MORI, Norihito KOBORI and Tsugio MIKI	1
Screening of Novel Proteins which Physically Interact with Human RFT1 Chiemi TANAKA, Kumiko KIRIHARA and Tetsuo TAKAHASHI	7
Optical evaluation of the optical thin films of absorbed water Saki NARITA, Hiroshi MUROTANI, Ryo OKUDA, Toshiki HARADA and Hiroki SUGIMOTO	13
Simple Steady-State Solutions of Radionuclide Migration of a Decay Chain through a Porous Medium by Focusing on the Similarities with the Sequential Radioactive Decay Formulas Yuta TAKAHASHI, Toshiaki OHE and Keiichiro WAKASUGI	21
Development of Dynamics Calculation Engine for Power System Simulator Masachika ISHIMARU and Hideto SEKIHARA	27
Comparison of Distilled Water Irradiated with Atmospheric-Pressure Plasma Jet in Air and Argon Gas Masato UCHIDA, Ikko MIKAMI, Masao ISOMURA and Hiroshi KUWAHATA	35
Optimal Placement Problem by Cooperative Control of SVR and LRT Syogo EI and Hidenori AOKI	41
Development of the Navigation Device Using Liner Oscillatory Actuators Takashi SUZUKI and Kazushige MAGATANI	49
Growth Rates of Large Trees Used for Urban Design and Architecture Wilfried WUNDERLICH, Iris MACH and Sonoko D. BELLINGRATH-KIMURA	55
Long-Term Strength Development Properties of High-Fluidity Ductile-Fiber- Reinforced Cementitious Composites Using Recycled Fine Aggregate Yumi MARUYAMA, Ken WATANABE and Naoto OTSU	63
Fundamental Study on the Fracture Behavior of RC Beam Made of High-Fluidity Ductile-Fiber- Reinforced Cementitious Composites Using Recycled Fine Aggregate Yuhei SHIRATORI, Ken WATANABE and Naoto OTSU	71
Experimental Study on High-Fluidity Ductile-Fiber-Reinforced Concrete Using Natural and Recycled Aggregate Ken WATANABE, Ken WATANABE and Naoto OTSU	79
Functional Approximation of Coverage Distribution in Shot Peening for Tilted Plates Takahiro OHTA	87

Basic Study on Suppression of Noise Generated by Conventional Railways	Takuya IWATA and Tatsuya MORISHITA ...	93
Synthesis of NiO/YSZ Composite by Microwave Heating	Daiki SUNAGA and Masashi YOSHINAGA ...	99
A Feasibility Study of the Quantitative Visualization of Shock Waves under 1/100th Atmospheric Pressure Environment	Taroh ODAGIRI and Toshiharu MIZUKAKI ...	103
